About Me

Experienced React frontend developer with 4 years of dedicated expertise crafting dynamic user interfaces. Proficient in frontend technologies and backed by solid backend knowledge. Passionate about producing high-quality products, I am a keen observer committed to delivering exceptional user experiences. My journey encompasses a blend of technical prowess and a drive for excellence, ensuring each project is executed with precision and innovation.

Work Experience

Lead Front-end developer :

Cashia

FEB 2022 till present

- Leading the front-end development team to deliver a financial services app that aims to centralize payments and make paying for goods and services effortless on time and within budget.
- Responsible for managing and delegating tasks to the front-end web and mobile development team promoting a collaborative work environment.
- Developed and implemented a mentoring program for junior developers that resulted in a significant improvement in their skills and productivity, reducing the need for senior developers' involvement in routine tasks and reducing turn-around time of completing tasks.
- Writing tests in a test-driven environment and managing CI/CD resulting in a stable continuous release of the app.

- TECHNOLOGIES:-

Typescript, React Native, ReactJS, Figma, Apollo, GraphQL, Slack, Jira, Git

Full Stack Software Engineer

Pata Pro

March 2020 to January 2022

- Implemented effective monetization strategies that enabled the system to accumulate up to Kes 5 million a day, demonstrating a strong understanding of revenue generation and business acumen.
- Provided support to the frontend team, contributing to a collaborative and productive team dynamic that reduced the turnaround time of implementing features.
- Maintained the system to ensure uninterrupted operation and fast response times, providing reliable and stable service to thousands of daily users. Oversaw deployments and load balancing using technologies such as Nginx,
- Apache, HAProxy, and Docker, ensuring the system was scalable, secure, and reliable.
- Proactively monitored the system for issues and developed solutions to address them, ensuring high availability and minimizing downtime.

-TECHNOLOGIES:-

Python, Django, ReactJS, Rest APIs, Docker, Nginx, HAProxy, Apache, Postman, Mattermost, Git, Microsoft Navision

Skills

- **React.js Expertise:** Mastery in developing robust and efficient user interfaces utilizing React.js, leveraging its advanced features to create dynamic and scalable applications.
- **TypeScript Proficiency:** Strong command over TypeScript, enabling type-checking and enhanced code maintainability, ensuring a more stable and error-free development process.
- **Fullstack Development:** Extensive experience in fullstack development, adept at seamlessly integrating frontend and backend components, ensuring smooth communication between layers of the application.
- **Problem-Solving Skills:** Proven ability to tackle complex technical challenges and find innovative solutions, with a keen analytical mindset and a systematic approach to troubleshooting.
- **API Development:** Skilled in designing, implementing, and maintaining RESTful APIs, ensuring efficient data exchange between the frontend and backend, enhancing overall application performance.
- **Agile Methodologies:** Proficient in Agile development practices, including Scrum and Kanban, adept at collaborating within cross-functional teams to deliver high-quality software solutions efficiently and adaptively.

Education

Bachelor of Science in Computer Science

Institution : MultiMedia University

Year of Graduation: November 2019

Nairobi, Kenya
